
Articles

- 311–315 **Internalization and Nuclear Localization of Interleukin 1 Are Not Sufficient for Function** Adriana Heguy, Cosima Baldari, Kevin Bush, Robert Nagele, Robert C. Newton, Richard J. Robb, Richard Horuk, John L. Telford, and Marialuisa Melli
- 317–322 **Malignant Transformation of Mouse BALB/3T3 Cells by Polyoma Middle T Antigen Requires Epidermal Growth Factor Receptor Expression** Mayumi Ono, Michihiko Kuwano, and Hsiang-fu Kung
- 323–333 **Stimulation of Interferon β Gene Transcription *in Vitro* by Purified NF- κ B and a Novel TH Protein** Lucie Cohen, Judith Lacoste, Michael Parniak, Luc Daigneault, Daniel Skup, and John Hiscott
- 335–341 **Autocrine and Paracrine Regulation of Tissue Inhibitor of Metalloproteinases, Transin, and Urokinase Gene Expression in Metastatic and Nonmetastatic Mammary Carcinoma Cells** Bozena Korczak, Robert S. Kerbel, and James W. Dennis
- 343–349 **p34^{cdc2} Is Physically Associated with and Phosphorylated by a cdc2-specific Tyrosine Kinase** Douglas K. Ferris, Gretchen A. White, David J. Kelvin, Terry D. Copeland, Chou-Chi H. Li, and Dan L. Longo
- 351–357 **Cyr61, Product of a Growth Factor-inducible Immediate Early Gene, Is Associated with the Extracellular Matrix and the Cell Surface** George P. Yang and Lester F. Lau

Research Capsule

- 359–364 **G-Protein-coupled Receptors, Phosphoinositide Hydrolysis, and Cell Proliferation** Wouter H. Moolenaar
