

Articles

- 1-10 **Human Smooth Muscle Myosin Light Chain-2 Gene Expression Is Repressed in *ras* Transformed Fibroblast Cells** C. Chandra Kumar and Cecile Chang
- 11-20 **Scatter Factor and Hepatocyte Growth Factor: Activities, Properties, and Mechanism** Madhu Bhargava, Ansamma Joseph, Jaromir Knesel, Ruth Halaban, Yuan Li, Susana Pang, Itzhak Goldberg, Eva Setter, Maribeth A. Donovan, Reza Zarnegar, George A. Michalopoulos, Toshikazu Nakamura, Donna Faletto, and Eliot M. Rosen
- 21-30 **Molecular Cloning of a Differentiation-related mRNA in the Adipogenic Cell Line 1246** Hui-Ping Jiang, Stephen E. Harris, and Ginette Serrero
- 31-42 **The Human Skeletal α -Actin Promoter Is Regulated by Thyroid Hormone: Identification of a Thyroid Hormone Response Element** Elaina S. R. Collie and George E. O. Muscat
- 43-52 **Relationships between *cdc2* Kinase, DNA Cross-Linking, and Cell Cycle Perturbations Induced by Nitrogen Mustard** Patrick M. O'Connor, Douglas K. Ferris, Gretchen A. White, Jonathon Pines, Tony Hunter, Dan L. Longo, and Kurt W. Kohn
- 53-61 **Altered Expression of Cell Cycle Related Genes Including *c-myb* in a Subclone of HL-60 That Exhibits Reversible Differentiation** Lawrence H. Boise, Steven Grant, and Eric H. Westin
- 63-71 **The *int-2* Gene Product Acts as a Growth Factor and Substitutes for Basic Fibroblast Growth Factor in Promoting the Differentiation of a Normal Mouse Mammary Epithelial Cell Line** Tiziana Venesio, Daniela Taverna, Nancy E. Hynes, Richard Deed, David MacAllan, Fortunato Ciardiello, Eva M. Valverius, David S. Salomon, Robert Callahan, and Giorgio Merlo

Research Capsule

73–80

**Proteins with SH2 Domains: Transducers
in the Tyrosine Kinase Signaling
Pathway**

Ben Margolis

i–ii
