

Articles

- 259–268 **Tumor Necrosis Factor Regulates Tyrosine Phosphorylation on Epidermal Growth Factor Receptors in A431 Carcinoma Cells: Evidence for a Distinct Mechanism** Nicholas J. Donato, Michael G. Rosenblum, and Peter A. Steck
- 269–278 **Overexpression of Three Ubiquitin Genes in Mouse Epidermal Tumors Is Associated with Enhanced Cellular Proliferation and Stress** Joanne S. Finch, Thomas St. John, Peter Krieg, Keith Bonham, Harry T. Smith, Victor A. Fried, and G. Tim Bowden
- 279–289 **Expression of the *PAX2* Gene in Human Fetal Kidney and Wilms' Tumor** M. R. Eccles, L. J. Wallis, A. E. Fidler, N. K. Spurr, P. J. Goodfellow, and A. E. Reeve
- 291–298 **Transforming Growth Factor β_1 Regulation of *c-myc* Expression, pRB Phosphorylation, and Cell Cycle Progression in Keratinocytes** Karl Munger, Jennifer A. Pietenpol, Mark R. Pittelkow, Jeffrey T. Holt, and Harold L. Moses
- 299–305 **Shift from Posttranscriptional to Predominant Transcriptional Control of the Expression of the GM-CSF Gene during Activation of Human Jurkat Cells** Diane Razanajaona, Christine Maroc, Marc Lopez, Patrice Mannoni, and Jean Gabert
- 307–313 **Regulation of *EGR-1*, *c-jun*, and *c-myc* Gene Expression by Oncostatin M** Jingwen Liu, Christopher H. Clegg, and Mohammed Shoyab
- 315–325 **Regulation of Epidermal Growth Factor Receptor Gene Expression in Murine Embryonal Carcinoma Cells** T. Joh, T. Darland, M. Samuels, J-X. Wu, and E. D. Adamson
-

Research Capsule

- 327–334 **The *ets* Gene Family** Arun Seth, Richard Ascione, Robert J. Fisher, George J. Mavrothalassitis, Narayan K. Bhat, and Takis S. Papas
-
